One Plexus Award Nomination

One Plexus

One Plexus is a phrase that has come to define the unique culture of Plexus Worldwide – both throughout the sales organization and within the corporate office.

This definition of the Plexus culture is all the more meaningful because it came about organically. The phrase was conceived as a convention theme but was soon embraced so fully by all members of the Plexus community that it came to be the definition of our culture.

The three attributes that most clearly define what One Plexus means are Belief, Partnership, and Action.

- One Plexus is Belief. **Belief** in the values of Plexus Worldwide®. Belief in being trustworthy, honest, reliable, and responsible. Belief in the vision and potential that Plexus represents worldwide.
- One Plexus is a seamless **Partnership** between and among everyone associated with Plexus. Unity. Stepping forward when there is a need; reaching out to help. Celebrating shared accomplishments over individual achievement.
- And One Plexus means **Action**. Taking action where it is needed in your community. Being a port in a storm. Being a blessing when you are blessed.
