

### Break free from overeating. Reach your weight loss goals.

When it comes to your diet, you want to make empowered choices that help you lose weight and be confident in how you look and feel. But in today's world, the temptation to overeat is everywhere. Portion sizes keep increasing, and unhealthy foods are everywhere, making healthy habits seem unrealistic. How do you make healthy choices when you feel unsatisfied and hungry?

Along with those concerns, many don't realize that the tie between healthy weight management and the health of the gut microbiome can play a key role. When you're not digesting properly and dealing with bad microbes in the gut, your weight loss efforts can be less effective, and your goals harder to achieve.

## Sip your way to more control

Clinically demonstrated to help you lose weight<sup>A</sup>, Slim Hunger Control features polydextrose, a powerful prebiotic fiber that not only feeds the beneficial microbes in the gut but also curbs cravings and reduces the desire to overeat. Polydextrose works to naturally boost GLP-1 production to signal satiety and help you feel full longer – so it is easier to make healthier eating choices and stay on the path to achieving your goals.\*
