The pink drink mix every body needs.

When it comes to a healthier and happier life, your gut is your best friend. But daily life — poor sleep, bad diet, lack of exercise, and even stress — affects your gut health by throwing off your body's microbial balance.

Rebalance your gut, recharge your life, and lose weight, with Plexus Slim[®] Microbiome Activating. Our bestselling dietary supplement has life-changing benefits and a refreshing raspberry, lemon, watermelon flavor.*

Healthy gut. Slimmer you.[®]

With Slim Microbiome Activating.*

Get ready to meet your favorite drink mix! With gut health and clinically tested weight loss benefits, Slim Microbiome Activating is the delicious supplement mix you'll find yourself reaching for over and over again.*

We've got a gut feeling – you're going to love it.

A strong, healthy gut can impact everything from your immune system to your weight. That's why it's so important to feed your gut what it needs — every single day.

Slim Microbiome Activating has been tested in an independent, highly advanced and scientifically validated in vitro study created to mimic the human gastrointestinal system. The results were amazing as Slim Microbiome Activating was shown to substantially increase beneficial gut microbes like *Lactobacillus*, *Bifidobacterium*, and *Akkermansia*.^{0*}

Clinically demonstrated to help you **lose weight**^{*}

See the benefits roll in... as the pounds roll off.

Slim Microbiome Activating supports healthy glucose metabolism and increases *Akkermansia* – a remarkable microbe, which positively impacts disrupted metabolism associated with being overweight.^{0*}

Slim Microbiome Activating has been clinically demonstrated to help you lose weight in a double-blind, placebo-controlled study.^{1*}

⁰Participants in an independent, randomized, double-blind, placebo-controlled, human clinical study who used one pack of Slim a twice daily lost an average of 5.45 pounds in 8 weeks, while the placebo group lost an average of 3.12 pounds. Although this difference was not statistically significant (p=0.05), there was a trend to weight decrease with the Slim group (p=0.059).

¹The results of an in vitro human gut simulator study suggest that Slim's formula may have several beneficial effects. Further research, including research conducted in humans, is needed to confirm these preliminary findings.
