

Slim | Microbiome Activating

PATENTED MICROBIOME SUPPORT*

Slim Microbiome Activating (MBA) helps your gut thrive with a powerful, patented blend, including the clinically demonstrated prebiotic xylooligosaccharides (XOS). Slim MBA feeds beneficial microbes and boosts *Akkermansia*, a microbe that positively impacts metabolism, increasing it up to 250 times to support weight management and overall gut health.◊*

A Healthy You Starts in Your Gut

Your gut contains a delicate balance of beneficial and unwanted microbes (your “microbiome”) that can affect everything from your mood to your immune system, glucose metabolism, and weight. For example, 70% of your immune system cells are in and along the gut. Also, 95% of your body’s serotonin is produced from your gut, both from your intestines and gut microbes.

Unfortunately, your gut microbiome’s balance can be disrupted by any number of factors—poor diet, high stress levels, artificial sweeteners, antibiotics, soda, processed foods, lack of exercise, or poor sleep habits (just to name a few).

Gut imbalance can cause problems that affect daily life, such as bloating, gas, occasional constipation, moodiness, and tension. If these concerns go unnoticed, digestive problems, skin issues, and mood fluctuations may occur.

Your Gut’s New Best Friend

Slim Microbiome Activating (MBA) helps your gut thrive. Packed with a powerful, patented ingredient blend, including the clinically demonstrated prebiotic xylooligosaccharides (XOS), Slim MBA feeds your gut’s beneficial microbes – increasing *Lactobacillus* up to 365 times and *Bifidobacterium* up to 290 times.◊*

Prebiotics feed beneficial microbes and help them grow and flourish. Prebiotics occur naturally in some foods like whole grains, chicory root, onion, leeks, fruit, and legumes, but most people do not get enough of these foods in their diets to naturally provide the prebiotic support the body needs.

Prebiotics, like the one contained in Slim MBA, can increase beneficial microbes after just a few weeks of use. Through consistent consumption, you can make sure you cultivate and maintain a healthy microbiome.*

A healthy gut can also lead to a slimmer you! See the benefits roll in ... as the pounds roll off! Slim MBA is clinically demonstrated to help you lose weight.[^] It works by increasing *Akkermansia*, a remarkable microbe that positively impacts the disrupted metabolism associated with being overweight. Results showed an impressive *Akkermansia* increase of up to 250 times, allowing you to reach your weight management goals while benefitting your gut microbiome.◊*

The chromium found in Slim MBA further supports these efforts by helping support a healthy glucose metabolism. In addition, Slim MBA increases the production of short-chain fatty acids Butyrate (which regulates energy metabolism) and Propionate (which may play an important role in appetite regulation). The formula also features a proprietary Plexus Slim® Blend of green coffee bean extract, *garcinia cambogia* fruit extract, alpha lipoic acid, and white mulberry fruit extract to further support healthy glucose metabolism, support weight loss, and provide antioxidants—all to support your health and weight goals.^{1*}

Slim MBA is a delicious way to feed your gut-friendly microbes, so your microbiome can stay balanced, while also helping you lose weight[^] safely and effectively. The Slim Microbiome Activating (MBA) formula is designed to help your gut thrive. Slim MBA has been tested in an independent, highly advanced, and scientifically validated in vitro study created to mimic the gastrointestinal system. This study demonstrated Slim MBA’s ability to help beneficial microbes flourish in the gut, improving overall health.◊*

¹When combined with a reduced calorie weight loss diet plan. Individual results will vary.

²The results of an in vitro human gut simulator study suggest that Slim’s formula may have several beneficial effects. Further research, including research conducted in humans, is needed to confirm these preliminary findings.

*These statements have not been evaluated by the Food and Drug Administration. This product is not intended to diagnose, treat, cure, or prevent any disease.

Here's what they found:

- Slim MBA, including a clinically demonstrated prebiotic, Xylooligosaccharides (XOS), works to feed the beneficial gut microbes increasing *Lactobacillus* up to 365 times and *Bifidobacterium* up to 290 times.◊*
- Slim MBA increases *Akkermansia* – an amazing microbe, which positively impacts disrupted metabolism associated with being overweight – up to 250 times.◊*
- Increases metabolism-boosting short chain fatty acids – Butyrate up to 58% and Propionate up to 29%.◊*

Primary Benefits

- Promotes the growth of beneficial gut microbes*
- Increases *Lactobacillus* up to 365 times and *Bifidobacterium* up to 290 times – contributing to overall health◊*
- Supports healthy glucose metabolism*
- Helps support cardiovascular health*
- Helps maintain healthy blood pressure levels already in the normal range*
- Clinically demonstrated to help you lose weight**
- Increases the metabolism enhancing *Akkermansia* microbes up to 250 times◊ *

Primary Features

- Clinically studied XOS prebiotic
- Patent protected formula
- Available in three delicious flavor options:
 - Raspberry lemon watermelon
 - Black cherry lime blossom
 - Sweet tea
- Only 5 calories
- No artificial colors**, flavors, sweeteners, or preservatives
- 30 single serve packets
- Gluten free, vegan, non-GMO

DID YOU KNOW?

Gut imbalance includes occasional bad breath, bloating, gas, constipation, moodiness, and tension. If these conditions go unnoticed, things like digestive problems, skin conditions, and mood fluctuation may occur.¹

Frequently Asked Questions

What is Slim Microbiome Activating?

Slim Microbiome Activating (MBA) is the delicious way to support your gut health and overall health. Slim MBA supports healthy glucose metabolism and feeds your gut with beneficial microbes which helps keep your gut microbiome healthy.*

When is the best time to drink Slim MBA?

Adults drink 1 serving up to twice daily. For weight loss – adults drink 1 serving 30 – 60 minutes before two main meals daily.¹ Simply tear the Slim packet and pour into your 12 – 20 ounce bottle of water and shake immediately.

How many Slim MBAs can I drink per day?

You can enjoy Slim MBA up to twice a day.

How much water should I use with Slim MBA?

Each packet of Slim MBA is recommended to be mixed into 12-20 ounces of water.

Should Slim MBA be added to hot or cold water?

Slim MBA is meant to be refreshing, and is best added to cold water. We don't recommend adding Slim MBA to hot water, as hot water could affect the integrity of the product.

Can you tell me about the study that was done on Slim MBA?

We wanted to see what Slim MBA can really do, so we put it through rigorous testing procedures. In a highly advanced, in vitro study created to mimic the human gastrointestinal system, Slim MBA's powerful microbiome activating formula was tested, which produced astounding results.*

- Increases *Lactobacillus* up to 365 times and *Bifidobacterium* up to 290 times – microbes that contribute to your overall health.◊*
- Increases friendly microbes called *Akkermansia* – a remarkable microbe, which positively impacts disrupted metabolism associated with being overweight – up to 250 times.◊*
- Increases Butyrate up to 58% and Propionate up to 29% – short-chain fatty acids that help regulate your metabolism.◊*

What is a prebiotic? How does it work?

Your gut is full of microbes. Some of them are beneficial; some of them are unwanted. Prebiotics are non-digestible compounds that make their way through our digestive system and feed beneficial microbes to grow and flourish. Prebiotics include non-absorbable carbohydrates like fructo-, xylo and oligo-saccharides, and inulin, which can be found naturally occurring in whole grains, chicory root, onions, leeks, fruits, and legumes. Prebiotics act as a fertilizer, selectively feeding beneficial microbes in the gut and assisting in their growth. This leads to benefits for your overall well-being and health. Nearly everyone needs to supplement their prebiotic intake to experience optimal health, since so few people get enough prebiotics from their diet.

What is the prebiotic in Slim MBA and how is it beneficial to me?

Xylooligosaccharides (XOS) is Slim MBA's incredible prebiotic, which friendly microbes love to eat. XOS has been clinically shown to improve intestinal microflora for enhanced health and well-being. In a double-blind, randomized, placebo-controlled study conducted by researchers at the University of California Los Angeles (UCLA), subjects who consumed a relatively small serving of XOS daily saw improvements in gut microbiota balance and growth of beneficial gut microbes, thereby promoting intestinal health.^{◊*}

What can you tell me about the quality of ingredients in Slim MBA?

The ingredients in Slim MBA were specifically qualified by our in-house Quality Assurance department using world-class quality standards. Each material is rigorously tested for purity and potency by Plexus Worldwide® before ever being selected for use. The difference in this hands-on approach and dedication to ingredient quality ensures that you can feel confident in the purity and potency of Slim MBA's ingredients.

Do I need to keep taking Slim MBA to keep the microbiome benefits?

The prebiotic nutrients that support the growth of the beneficial microbes in the intestinal tract will diminish over time, and the increased population of beneficial microbes will eventually return to their baseline levels if they aren't continually fed with the nutrients they need to thrive. So it's best to take Slim MBA every day.*

Will I experience any side effects when I start drinking Slim MBA?

In certain people, supplementing with prebiotics could cause temporary gas and bloating. One way to avoid this is to ease into Slim MBA. We recommend starting with 1/2 stick per day for the first week, 1 stick for the second week and up to 2 sticks per day after the second week. Of course you can do more or less

depending on how your body reacts. Your gut microbes should adapt to prebiotic supplementation over time, which will help relieve any discomfort.

What is the difference between Slim Microbiome Activating and Slim Hunger Control?

Slim Hunger Control is an expansion of the Slim family. Both options help you lose weight[◊] and support a healthy glucose metabolism, but they each use different prebiotic sources to give your body what it needs, when it needs it. Slim MBA with XOS, a powerful prebiotic, promotes the growth of beneficial gut microbes, while Slim Hunger Control with Polydextrose, a calorie-smart soluble prebiotic fiber, helps to keep you feeling full longer.*

Can Slim Microbiome Activating and Slim Hunger Control be used together?

Yes! For increased health benefits, combine Slim Hunger Control with Slim MBA. Designed to work hand in hand, our Slim family helps you lose weight[◊] and supports a healthy glucose metabolism. It is recommended to use each once daily, for a total of two servings per day.*

If I'm not trying to lose weight, will I still benefit from taking Slim MBA?

Absolutely! Slim MBA is a delicious dietary supplement mix with amazing microbiome benefits. Even if you are not looking to lose weight[◊], Slim MBA delivers prebiotics that promote the growth of beneficial gut microbes and support a healthy glucose metabolism. You are drinking your way to a healthier, happier gut!*

Is it safe to drink Slim MBA while pregnant or breastfeeding?

If pregnant or nursing, consult your physician prior to use.

What flavor is Slim MBA?

Slim MBA is available in delicious raspberry lemon watermelon, black cherry lime blossom, or sweet tea flavors.

Is Slim MBA Gluten Free, Vegan, and Non-GMO?

Yes.

Can I take Slim MBA with other Plexus® products?

Absolutely! Slim MBA is the perfect complement to other Plexus products. We recommend taking Slim MBA with ProBio 5® and Bio Cleanse®, together, these three products make up the Plexus Gut Health System. Slim MBA can also be taken with other weight management products including Slim Hunger Control, MetaBurn, and Balance.

Is Akkermansia in Slim MBA or already in your gut?

Akkermansia is a beneficial bacterium that is already present in your gut. Slim Microbiome Activating's formula with XOS helps feed beneficial microbes and has been shown in a preliminary study to increase Akkermansia levels up to 250 times.^{◊*}

[◊]When combined with a reduced calorie weight loss diet plan. Individual results will vary.

^{*}The results of an in vitro human gut simulator study suggest that Slim's formula may have several beneficial effects. Further research, including research conducted in humans, is needed to confirm these preliminary findings.

*These statements have not been evaluated by the Food and Drug Administration. This product is not intended to diagnose, treat, cure, or prevent any disease.

Does Slim MBA contain any common food allergens (Milk, Eggs, Fish, Crustacean shellfish, Tree nuts, Peanuts, Wheat, Sesame and Soybeans)?

No.

Is Chromium safe?

Many human studies have demonstrated the safety of daily intakes of up to 1,000 mcg of Chromium and each serving of Slim MBA contains 200 mcg. Scientific authorities and professional associations, including the Institute of Medicine (IOM), the National Research Council (US), and the Council for Responsible Nutrition (CRN), have stated that the clinical trial data are sufficient to indicate safety for Chromium supplements at levels of up to 1,000 mcg per day for healthy adults.

If I'm allergic to certain fruits, can I still drink Slim MBA?

Plexus® uses flavors that are extracted from actual fruit. Typically, the proteins that could cause an allergic reaction would be removed during extraction. The possibility of an allergic reaction is very small; however, we recommend that if you have an allergy to any of these fruits, please consult your physician prior to use.

What is the fruit and vegetable juice for color in Slim MBA?

The fruit and vegetable juice in Slim MBA for color is the following:

- Beetroot Extract (*Beta vulgaris*)
- Sweet Potato Concentrate (*Ipomoea batatas L.*)
- Radish Concentrate (*Raphanus sativus*)
- Cherry Concentrate (*Prunus avium*)
- Apple Concentrate (*Malus domestica*)

Is there a corn-derived ingredient in Slim MBA?

XOS is derived from Non-GMO corn. If you're allergic to corn, please consult your physician prior to use.

What is the exact source of the XOS in Slim MBA?

The XOS in Slim MBA is derived from Non-GMO corn.

Can Slim MBA be used by individuals under the age of 18?

Slim MBA is not recommended for use by individuals under 18 because the product was formulated to meet the nutritional needs of adults.

Is there caffeine in Slim?

Slim Sweet Tea contains about 25 mg of caffeine per serving.

Can I take Slim MBA with my other Plexus products?

Absolutely! Slim MBA is the perfect complement to

other Plexus products. We particularly recommend taking it with Bio Cleanse with ProBio 5®, which make up the Plexus Gut Health System.

Can I use Slim MBA with my medication?

As with all Plexus products, we recommend that you consult your physician before adding any supplement to your daily regimen alongside medications.

Is Slim MBA safe for pregnant or nursing women?

As with any new vitamin or supplement, we recommend consulting with your healthcare provider before starting use during pregnancy or while nursing. They can provide personalized advice to ensure the products are safe for you and your baby.

Does Slim MBA contain gluten?

Slim MBA is gluten-free.

*These statements have not been evaluated by the Food and Drug Administration. This product is not intended to diagnose, treat, cure, or prevent any disease.

plexus.

†Percent Daily Values are based on 2,000 calorie diet.

†Daily Value (DV) not established.

Other Ingredients: Natural flavors, citric acid, stevia leaf extract, cellulose gum, and silicon dioxide.

Alpha Lipoic Acid (ALA)

Alpha lipoic acid is a fatty acid, found naturally inside every cell in the body. ALA is a potent antioxidant and helps recycle other antioxidants such as vitamin C and E and glutathione. Alpha lipoic acid is found in Slim MBA and Plexus Nerve®.*

Beet (*Beta vulgaris*) Root Extract

Beet root is the red or purple root vegetable known as the beetroot or garden beet. Plexus® uses non-GMO beet root which provides natural color in Slim MBA.

Cellulose Gum

Cellulose gum comes from natural cellulose obtained from wood pulp and cotton fibers. A natural, non-GMO version of cellulose is modified to form a gum that helps give a well-rounded mouth feel in Slim MBA.

Chromium Polynicotinate

Chromium polynicotinate is a combination of chromium and niacin. This form of chromium has been found to be a more bioavailable source. Chromium is an essential trace mineral that supports energy and healthy glucose metabolism. Chromium polynicotinate also helps facilitate glucose transport into cells.*

*These statements have not been evaluated by the Food and Drug Administration. This product is not intended to diagnose, treat, cure, or prevent any disease.

Slim

Citric Acid

Citric acid can be found naturally in citrus fruits such as lemons and oranges. The citric acid found in Slim MBA is non-GMO.

Garcinia Cambogia (*Garacina Cambogia Desr.*)

Fruit Extract

Garcinia cambogia is a citrus fruit tree that grows in Southeast Asia. Plexus® uses a standardized extract from the fruit rind that contains a phytonutrient called hydroxycitric acid (HCA), which is a bioactive compound. Slim MBA uses a non-GMO *garcinia cambogia* extract.

Green Coffee Bean Extract

Green coffee bean extract is derived from coffee that has not yet been roasted. Green coffee beans have a higher level of chlorogenic acid compared to regular, roasted coffee beans. Research has shown that chlorogenic acid helps activate lipolysis, the process of lipid release from fat cells, which enhances fat burning. Because of this, green coffee bean extract has been shown to help with weight loss. Slim MBA uses a non-GMO green coffee bean extract standardized to 50% chlorogenic acid and less than 2% of natural caffeine.*

Silicon Dioxide

Silica is one of the most abundant minerals on earth. In Slim MBA, the form used is a food grade silica that is ultra-pure and free of contaminants and helps powders mix more easily.

Stevia (*Stevia rebaudiana*) Leaf Extract

Stevia is a perennial herb native to South America that has been used for centuries as a traditional herb and a natural sweetener. The extract is prepared from the sweet-tasting leaves and is standardized to 99% rebaudioside A. The extract is then purified by filtration and crystallized into a compound that is typically 200 times sweeter than table sugar and has zero calories. Plexus uses a pure, non-GMO stevia.

White Mulberry (*Morus Alba*) Fruit Extract

White mulberry fruit has a long history of traditional use in China and Europe and contains health-promoting phytonutrients. White mulberry extract is considered a superfood and a potent antioxidant.*

Xylooligosaccharides (XOS)

XOS is a prebiotic that feeds beneficial bacteria. XOS is derived from a non-GMO corn-derived form of oligosaccharide called xylooligosaccharides. In a double-blind, randomized, placebo-controlled study conducted by researchers at the University of California Los Angeles (UCLA), subjects who consumed a relatively small serving of XOS daily saw improvements in gut microbiota balance and growth of beneficial gut microbes, thereby promoting intestinal health. XOS is effective in promoting intestinal health and is found in Slim MBA.◊*

◊The results of an in vitro human gut simulator study suggest that Slim's formula may have several beneficial effects. Further research, including research conducted in humans, is needed to confirm these preliminary findings.

*These statements have not been evaluated by the Food and Drug Administration. This product is not intended to diagnose, treat, cure, or prevent any disease.
